

Why can't we all just get along? Local traffic reports should not mind assistance. Look at all the radio stations, in Miami- WMXJ, WINZ, WIOD, WQAM, WCTH, WLYF, etc. and they do not get it right. Why does NAB think satellite will do better. By the time a "situation" is reported to the public/driver, it is too late and you can not get around it anyway. Let XM try. There is plenty of air space for all of you.
